

A stylized, pixelated letter 'I' with a vertical gradient from light gray at the top to black at the bottom. It has a wide top bar and a wide bottom bar.

Two horizontal bars, one above the other, with a gradient from light gray to black. They are positioned between the 'I' and the '1'.

A stylized, pixelated number '1' with a vertical gradient from light gray at the top to black at the bottom. It has a small top bar and a wide bottom bar.

A stylized, pixelated number '0' with a vertical gradient from light gray at the top to black at the bottom. It has a curved top and a wide bottom bar.

A stylized, pixelated number '2' with a vertical gradient from light gray at the top to black at the bottom. It has a curved top and a wide bottom bar.

A stylized, pixelated number '3' with a vertical gradient from light gray at the top to black at the bottom. It has a curved top and a wide bottom bar.

A stylized, pixelated number '4' with a vertical gradient from light gray at the top to black at the bottom. It has a curved top and a wide bottom bar.

A pixelated, black and white representation of the number 1. The digit is composed of a vertical stem with a horizontal top bar and a horizontal base bar. The edges are slightly blurred, giving it a soft, hand-drawn appearance.

A pixelated, black and white representation of the number 2. The digit consists of two parallel horizontal bars, one above the other, with a small gap between them. The edges are slightly blurred.

A pixelated, black and white representation of the number 3. The digit is formed by two curved strokes that meet at the top and bottom. The top curve starts from the left, goes up and then down to the right. The bottom curve starts from the left, goes down and then up to the right. The edges are slightly blurred.

A pixelated, black and white representation of the number 4. The digit is formed by a vertical stem on the right and a horizontal bar at the top. The stem has a small horizontal tick at the top left. The edges are slightly blurred.

A pixelated, black and white representation of the number 5. The digit is formed by a vertical stem on the right and a horizontal bar at the top. The stem has a small horizontal tick at the top left. The edges are slightly blurred.

A pixelated, black and white representation of the number 6. The digit is formed by a vertical stem on the right and a horizontal bar at the top. The stem has a small horizontal tick at the top left. The edges are slightly blurred.

A pixelated, black and white representation of the number 7. The digit is formed by a vertical stem on the right and a horizontal bar at the top. The stem has a small horizontal tick at the top left. The edges are slightly blurred.
